Check out our Japanese version of the software! We are very happy to announce that ArcGIS Pro 1.3 has been released. As usual, it contains a lot of new features and improvements. In this post, we will give you a few highlights and take a closer look at some new features. The new version of ArcGIS Pro 1.3 introduces three new map types: Labels, Line and Shape Labels, which are also compatible with ArcGIS Pro. In previous versions of ArcGIS Pro you could use Symbols, 2D or 3D symbols and 2D or 3D labels, and these three types of labels are now also available as map types, and they can be used in your next ArcGIS Pro maps. ArcGIS Pro 1.3 introduces 3D Data Views. In previous versions, there were only 2D Data Views, but now you can also create 3D data views to select and explore data points in 3D. ArcGIS Pro 1.3 introduces the Buildings Data View, which allows you to create a 3D model of your building(s). The new version of ArcGIS Pro introduces a built-in Project Manager. The Project Manager is a feature to manage your projects, new or existing. You can create and manage all your project settings, and you can also easily create and share your work. ArcGIS Pro 1.3 introduces a new features of managing collections. In previous versions of ArcGIS Pro, when you wanted to save your data, you had to save it directly in the desktop by using the Save Data dialog. Now, using the new Collections Manager, you can save your data to collections, in which you can organize your data in categories and group them together. The new version of ArcGIS Pro 1.3 introduces a brand new Feature Labels tool that will make it easy to create labels for feature layers in your map. It is part of the Labels extension for ArcGIS Pro and comes as a free extension for ArcGIS Pro. The ArcGIS Pro Editor is the heart of ArcGIS Pro, and as the newest version of ArcGIS Pro 1.3 contains many new features and improvements. ArcGIS Pro Editor 3.2 has also been released. ArcGIS Pro Editor 3.2 includes a new type of editor view that lets you create and edit both 2D and 3D maps in a space optimized 82157476af
